DETAILED ACTION

Claims 1-17 are pending. Drawings, 40 sheets, were filed with the application.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on June 18, 2004 was considered by the examiner.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-17 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-30 of U.S. Patent No. 6,617,348 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are directed to the same generic concept. Note that the claim 1 of the patent and the application are identical - except for the word 'such as' instead of the word 'including' when defining variable F. Further, note that claims 3 and 12 of the application are identical to claims 2 and 3 respectively of the patent.

DeBrabander et al disclose compositions/compounds as are instantly claimed and their use as pharmaceuticals. See claims 1-30, abstract.

One of ordinary skill in the art would thus be motivated to prepare compounds from under the DeBrabander et al genus in order to obtain additional pharmaceutical agents. Also, one of ordinary skill in the art would be motivated to prepare compounds structurally similar to those of DeBrabander et al in the expectation of obtaining a useful pharmaceutical compound as compounds similar in structure are expected to have similar properties. The level of skill in the art is further reflected in *In re Lohr* 137 USPQ 548 at 549 (CCPA 1963), and in *In re Payne* 204 USPQ 249 at 254 (CCPA 1979).

The species claims are included as the genus of the reference is so limited that they would be immediately apparent to one of ordinary skill in the art.
